

VXD deluge valve offers a lighter weight solution

Viking's VXD deluge valve offers a more lightweight solution for deluge and preaction systems. The VXD makes for easier installation, particularly in tight spaces, while offering the same robust quality and durability that Viking customers are used to. The product joins Viking's industry-leading line of valves and systems as a smaller option for system risers.

Additional benefits of the VXD deluge valve include:

- The valves are available to order in multiple sizes of GxG and FxF models
- VXD valves are available in sizes ranging from 1-1/2" - 10"
- The VXD line of valves still feature a self cleaning seat and clapper
- The VXD deluge valve is offered for use with hydraulic, pneumatic and electric release deluge systems and electric, pneumatic, electric/pneumatic and electric/pneumatic preaction systems
- The line is available pre-trimmed, with PTR trim, or with loose trim
- The pre-trimmed preaction system is offered with a check valve in place
